

Notes for use

- If necessary, ask your family members or someone else to put the ear drops in for you.
- Never use discoloured, deteriorated or expired ear drops.

Possible side effects

Instillation of cold ear drops can cause dizziness. For ear drops that require refrigeration, hold the bottle in your hands for a few minutes and warm the ear drops to near body temperature before use.

Consult your doctor immediately if you experience any allergic reactions such as skin rash, swelling of the face or hands and breathing difficulty.

Storage

Store the medications in a cool, dry place and away from direct heat and light. Generally, there is no need to store in the refrigerator unless stated on drug labels.

Store the medications out of reach of children to avoid accidental ingestion.

Discard any leftover ear drops as directed by the drug label.

This information leaflet is for reference only.

Medicines should be used as directed by the doctor and pharmacist.

For enquiry, please contact your doctor, dispensary staff or other healthcare professionals.

Do not share your medicine with others.

How to use Ear drops

1 Wash your hands with soap thoroughly.

3 Gently pull the ear upward and backward (for adults), or downward and backward (for young children).

5 After instilling, keep your head tilted sideways for about 2 minutes to allow the medicine to spread inside the ear.

2 Face your affected ear upward by tilting your head sideways or lie on your side.

4 Instil into your ear the prescribed number of drops. Avoid touching the bottle tip by your hand or ear to prevent contamination.

6 Do not wash the tip. Place the cap back to the bottle and tighten it right away.
