

Canada: Two unauthorized products "B-Hard on Demand" and "Wonderblue" seized at Désirs et Plaisirs in St-Jérôme, QC may pose serious health risks

Health Canada has seized two unauthorized products being promoted as natural health products for sexual enhancement from Désirs et Plaisirs in St-Jérôme, Quebec. These products were found to contain undeclared prescription drug substances and other drug substances that may pose serious risks to the health of Canadians.

The products affected are “B-Hard on Demand” and “Wonderblue” which are both found to contain undeclared sildenafil as well as thiodimethylsildenafil and/or thiomethisosildenafil.

Thiodimethylsildenafil and thiomethisosildenafil are unauthorized substances similar to sildenafil. Products containing sildenafil should only be used under the supervision of a healthcare practitioner. Sildenafil should never be used by individuals taking any kind of nitrate drug (e.g. nitroglycerine) as it can cause potentially life-threatening low blood pressure. Individuals with heart problems, including high blood pressure, a history of heart attack, stroke, abnormal heart beat or chest pain, are at higher risk of cardiovascular side effects. Other possible side effects of using sildenafil include headache, facial flushing, indigestion, dizziness, abnormal vision and hearing loss.

Consumers are advised to consult with their health care practitioner if they have used this product and have health concerns.

Please refer to the following website in Health Canada for details:
