

The United States: Public Notification: 90° Jiushidu Capsules contain hidden drug ingredient sildenafil

The Food and Drug Administration (FDA) is advising consumers not to purchase or use 90° Jiushidu Capsules, a product promoted for sexual enhancement. This product was identified by FDA during an examination of international mail shipments.

FDA laboratory analysis confirmed that 90° Jiushidu capsules contain sildenafil, the active ingredient in the FDA-approved prescription drug Viagra, used to treat erectile dysfunction (ED). This undeclared ingredient may interact with nitrates found in some prescription drugs such as nitroglycerin and may lower blood pressure to dangerous levels. Men with diabetes, high blood pressure, high cholesterol, or heart disease often take nitrates.

Please refer to the following website in FDA for details:
